Professional Summary

Software Engineer with experience in developing and maintaining enterprise banking applications using Angular and Node JS. Skilled in building responsive user interfaces, integrating REST APIs, implementing unit tests using Jasmine, Karma, and Vitest, and working with Git/GitLab-based development workflows. Experienced in Angular standalone components, RxJS, and CI/CD practices.

Technical Skills

Angular, TypeScript, JavaScript, React.js, RxJS, Node.js, Express.js, MongoDB, SQL, Jasmine, Karma, Vitest, Git, GitLab, Postman, CI/CD, Java, Python, C++, C

Professional Experience

Nov 2024 – **Systems Engineer, Tata Consultancy Services (TCS), Chennai**

- Present
 - Developing and maintaining enterprise-scale banking applications using Angular 21.
 - Building reusable and responsive UI components to enhance maintainability and user experience.
 - Integrating RESTful APIs and implementing client-side business logic for banking workflows.
 - Utilizing RxJS and Angular standalone components for efficient data handling and application performance.
 - Writing and maintaining unit test cases using Jasmine, Karma, and Vitest.
 - Managing source code through Git and GitLab and contributing to CI/CD-based deployment workflows.
 - Supporting defect resolution, performance optimization, and production issue analysis.

Oct 2023 – **Software Developer Intern, Nokia Networks and Solutions, Bangalore**

- Jul 2024
 - Developed an internal MERN stack web application for employee terminology management.
 - Designed and implemented features for searching and managing technical terms.
 - Contributed to UI improvements and application usability enhancements.

Projects

Enterprise Banking Application, Tata Consultancy Services

- Contributing to the development and maintenance of enterprise banking modules using Angular 21.
- Implementing dynamic UI components and integrating REST APIs.
- Developing unit tests using Jasmine, Karma, and Vitest to improve application reliability.
- Supporting release activities through GitLab-based CI/CD workflows.

Emotion Detection Chatbot, Final year project

- Developed a chatbot capable of detecting user emotions using OpenCV and Convolutional Neural Networks (CNN).
- Integrated entertainment recommendations including songs, movies, motivational quotes, and jokes based on detected emotions.

Online Thesaurus for Internal Employees, Nokia Networks and Solutions

- Developed a MERN stack-based web application used internally for managing and searching technical terminology.
- Designed a user-friendly interface for efficient term management and retrieval.

Education

2020 – 2024 **B.E. Computer Science and Engineering, Sathyabama Institute of Science and Technology, Chennai**
CGPA: 9.18

2020 **Higher Secondary Education (12th Standard), Springfield Matriculation Higher Secondary School**
89.5%

2018 **Secondary Education (10th Standard), Springfield Matriculation Higher Secondary School**
92.2%
